PROFILE

I define myself as a perseverant, methodical and organized person. I'm in constant learning and working to improve myself.

As a professional, I always give my best, not only meeting deadlines and delivering a neat job, but also being in constant communication.

WORK EXPERIENCE

Soyhenry

K9 App - Fullstack Developer

Soyhenry, Academic experience 2022

Development of a SPA (Single-page application) with a dog breed theme, which consumes an API for existing breeds as well as the creation of new ones that were stored in a database, it also allows filtering and ordering for a more efficient search.

Technologies used: React, Redux, Javascript, CSS Module, Node.js, express, Postgres SQL, Sequelize

Mi scusi books - Fullstack Developer

Soyhenry, Academic experience 2022

Group academic experience consisting of 4 weeks of work under the SCRUM methodology, developing an ecommerce of books. My rol was as a fullstack developer but focused mainly on routes development and database modeling.

Technologies used: React, Redux Toolkit, MaterialUI, Node.js, Express, MongoDB, Mongo Atlas, Mongoose, PayPal, Google OAuth2, Ant Desing, CSS, Node Mailer, JWT

Selected by soyhenry among the 4 top projects of the course

Teaching Assistant

Soyhenry 2022

- Corrdinate a group of students to achieve integration
- Provided assistance to solve exercises and promote group collaboration
- Acted as liaison between the bootcamp's administration and the students, providing feedback and ideas to improve the bootcamp processes

Olanet S.R.L

October 2013 - December 2021

I held different positions within the company:

- As IT support I reduced the re-entry of repaired computers by 15%. With the implementation of new wired networks on the different client companies, we managed to reduce on-site assistance by almost half
- As after-sale service I managed to implement a systematic wat of working, expediting the warranty process and reducing the waiting time of customers
- As warehouse manager, I was in charge of organizing it in such a way that the search for products was effective and efficient, reducing product search times and therefore the customer's waiting time
